## CAREER PROFILE

---

Enthusiastic and detail-oriented Java Developer with a passion for developing efficient and reliable software solutions. Skilled in troubleshooting and debugging. Proven ability to apply theoretical knowledge through hands-on projects with a strong foundation in software development.

## SKILLS

---

**Backend Development:** Core Java, J2EE, JSP, JAXP, Hibernate, Spring Boot, Spring MVC, Spring Security, Spring Data JPA RESTful web services, Microservices.

**Databases:** Oracle, MySQL

**Web Technologies:** HTML, CSS, JavaScript, JQuery

**Tools:** Maven, Postman, Git, Github, Junit, Jacoco, SonarQube, Swagger, Open API

## EXPERIENCE

---

### Growthify Services

Indore

Java developer Intern

Nov 2024 – Present

- Assisted in the development of Java applications, gaining hands-on experience in a corporate environment.
- Contributed to the development of a Java-based e-commerce platform, which saw a 15% increase in user engagement.
- Participated in the debugging and optimization of existing Java applications, enhancing system performance by 10%.
- Engaged in weekly coding sprints, consistently meeting deadlines and contributing to a 5% overall increase in team productivity.
- Worked with Spring Boot, REST APIs, and database management, gaining exposure to Microservices architecture and improving backend scalability.

## PROJECTS

---

### E-Commerce Order Management System

*Technologies Used: Java, Spring-Boot MVC, Spring Boot-Data-JPA, Spring Security, MySQL*

- Designed and developed a Java Spring Boot-based E-commerce Order Management System, enabling seamless product order processing.
- Implemented user authentication and authorization using Spring Security & JWT to ensure secure access.
- Used Spring Data JPA & MySQL for efficient database management, improving query performance.
- Integrated Swagger for API documentation and tested endpoints using Postman to ensure robustness.

### Smart Contact Manager

*Technologies Used: Java, J2EE, Spring-Boot MVC, Spring Boot-Data-JPA, Thymeleaf, JavaScript, MySQL*

- Developed a web-based application to manage personal contacts with user authentication and role-based access.
- Implemented CRUD operations for contacts using Spring Boot Data JPA.
- Designed the front-end using Thymeleaf for dynamic content rendering and integrated responsive UI with HTML, CSS, and JavaScript.
- Secured the application using Spring Security for login and role management (user/admin).
- Utilized MySQL for database management and implemented Hibernate for ORM.
